

- .You are involved in the Design, Construction and Operation of Tunnelling and Underground Space use.
- .You are Owners, Contractors, Manufacturers, Consultants, Bankers, Insurers.
- .You need to educate and train your teams and to check that your partners' teams are educated and trained.
- .You want to help countries to develop their knowledge and skills.

Ask the Foundation to contribute

The creation of the ITACET Foundation has been promoted by the the International Tunnelling and Underground space association ITA-AITES as a body for education and training actions. ITA was founded in 1974, is based in Lausanne, Switzerland and counts 55 Member Nations.

More about ita on: www.ita-aites.org .

Activities & services

Preset Workshops and Training Sessions

- . Sprayed concrete in Underground Structures
- . Risk Management in Tunnelling
- . Mechanized Tunnelling
- . Conventional Tunnelling
- . Safety during Construction and Operation
- . Waterproofing in Tunnelling
- . Underground Use for Sustainable Development

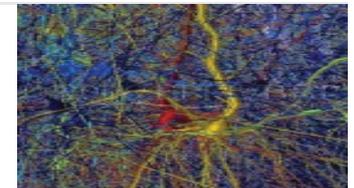

Taylor-made seminars and training sessions upon your organization's request

Connecting professionals

A network of companies and academic institutions

The ITACET foundation connects all types of professionals working in the very specific sector of tunnelling and underground space: technicians, lawyers, financiers, environmentalists, safety officers...

University network

ITA has developed the concept of university network in organizing training courses and in endorsing professional master courses on tunnel engineering carried out in other institutions.
